ECLIPSE, THE LEADING SOLUTION FOR THE HOSPITALITY INDUSTRY

The Eclipse solution incorporates the latest discreet technological advances to satisfy a broad demographic of Guests and their changing expectations.

With our IPTV and HD offer, your guests have within their reach the richest possible services and content, perfectly suited to their needs.

Eclipse 2.5 allows Hoteliers to raise the levels of service, offering Guests further differentiation and choice.

Advertise your services in a fresh and innovative way to generate additional revenue.

ECLIPSE 2.5, A NEXT-GENERATION GRAPHIC INTERFACE

- **Custom design:** customise the look and feel of the TV Welcome screen, with high resolution photos and video to extol the virtues of the Hotel and your facilities.
- **A livelier interface:** give your Guests an intuitive and animated introduction to the Hotel and Brand, with a background or living TV wallpaper, made up of high resolution images and movies which visualise the relevant service.
- **Genuine personalisation:** a TV station can be set as the default background for the interface.
- **Electronic programming guide:** lists all TV stations and related programming.
- **Mosaic view:** visualise the full array of your content (TV stations, movies, radio, hotel services, etc.) in a mosaic view to enjoy intuitive navigation.
- **Categorisation by language or by genre:** enables the guest to easily find what they are looking for.

ADVERTISE AND PROMOTE YOUR SERVICES & FACILITIES

- **Update your information pages:** ECLIPSE 2.5 includes a simple to use and intuitive publishing tool so you can update (in real-time) information about the Hotel (special events and promotions along with the services, facilities, directory, menus, etc.).
- **Incorporate and integrate Web-based services:** ECLIPSE 2.5 integrates with back office and 3rd party systems by way of a Web interface (.xml) so the TV can be used as a portal to access these services, from booking facilities, room service, e-commerce applications, in-room controls, etc).
- **Use the TV as an interactive Guest communication portal:** Inform the Guest through the HD TV screen with dynamic text, images, clips and features. With our e-com applications and service, the TV portal can be offered as a personalised source of real-time information and assistance for each Guest.

- A smartphone application for Iphone or Ipod Touch interfaced with Eclipse.
- Manage the TV network, view programming, view movie trailers and order VOD movies using your mobile phone.
